

INNOVATION FACT SHEET

eHub

Establish your own charging network

Regardless of whether countries, metropolises, municipalities or companies, many players are looking for customer-friendly solutions to offer EV drivers access to all charging stations in the market. The emobility market, due to a very high segmentation and number of different suppliers, has very regional challenges that need to be taken into account when considering the optimal solution. With the eHub solution expansion of the Hubject portfolio, partners can build national, regional or municipal charging networks. The standalone bundling of charge point operators and emobility service providers to a self-sufficient network is achieved through the new multiclient accessible platform solution from Hubject.

eHub achieves an open, market conform network

The open platform-licence model of the joint venture from Berlin enables companies and public institutions to build and manage standalone regional charging networks. The connection of the eHub solution with all interchange partners creates an open European system landscape and enables customer-friendly charging without limitations. Partners profit from all proven digital electric mobility services of the Hubject platform and transform themselves, through the use of these services, into an eRoaming platform operator.

Areas of application:

For countries and regions

Will you offer eRoaming services exclusively in your region?

Hubject will provide you with all the necessary technical and regulatory components.

For defined consumer groups

Are you a specialist in a specific consumer group?

Use your expertise and operate eRoaming services on top of your existing products.

For organisations and consortiums

You want to build your own network with your partners?

For more than four years, Hubject connects players of the emobility market together, Europe-wide.

We offer:

- Platform solution in the form of an individualised modular system
- eRoaming know-how from the operator of the largest B2B network of emobility in Europe
- Continuous improvement of the system landscape
- A strong European brand „interchange“ that is already trusted by more than 190 B2B partners

You benefit from:

- Experienced consultation and support
- Partner exchange regarding areas for improvement
- The possibility of a joint development of the product portfolio
- The possibility of joint marketing operations with Hubject throughout the whole interchange network
- Detailed documentation regarding the operation and service of the IT platform
