Extended reach: Step into the world's biggest charging network

▼ **interchange DIRECT**

Higher revenues: address a completely new target group

▼ **interchange BILLING**

Faster Billing Process: Optimize workload and profit by automization plus flexible pricing

AT A GLANCE

Scale today

Wherever you start from, you can get the most out of your infrastructures' potential with interchange BILLING. Not tomorrow. Today.

Automate your process

Be successful instead of having your hands full: interchange BILLING allows you to hand over your clearing and invoicing processes over to highly effective machines.

Flex your prices

Thanks to OICP 2.2, your system can now directly communicate flexible prices to our platform. This means that by using interchange BILLING, you can increase the complexity of your pricing models without increasing your clearing efforts.

WHAT WE OFFER

Fail-safe data validation

interchange BILLING handles every single step of the clearing process in a fully automated way. From validation to invoicing, simply set up automated invoice mailing with each of your partners and have some extra time to focus on more important tasks.

Full control

The interchange BILLING portal allows you to centrally manage and analyze all transactions: quickly view the turnover for any selected time period, export machine-readable data and integrate it in to your existing systems and analytic tools.

High flexibility

Manage your charging conditions depending on various parameters. Set local VAT rates for each of your partners individually. With OICP 2.2, you can edit flexible prices in a fully automated way – for optimum utilization and maximum profit.

Faster Invoicing

Unleash the full potential of your infrastructure: Achieve simple processes and optimized utilization – more outcome, no more work. Based upon machine-readable data interchange BILLING is your first step into fully scalable business.
