

# For Charging Station Producers

## Software

# Fast lane to success.

An interchange CHECK certificate accelerates your software solution on the road to success: showing that your system solution is compatible with the world's biggest eRoaming platform gives it key competitive advantages in the eMobility market.

## AT A GLANCE

### **Connection and certificate**

interchange CHECK encompasses the test and certification of your system solution by connecting it to the testing environment of the world's biggest eRoaming platform.

### **Platform for your image**

Use the Hubject partner site as an advertising platform for your solutions.

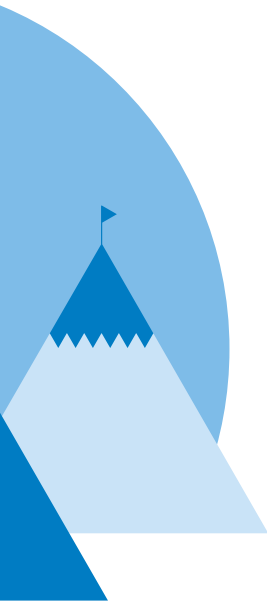

### **Profile on the market**

Show other market players that your systems are Hubject-compatible and meet the requirements for cross-provider eRoaming.

### **Extend your product portfolio**

Extend your systems to include eRoaming functionality.

### **The quality seal**

With interchange CHECK you gain the attention on the market - plus extended reach and higher visibility in the world's biggest charging network.

## COSTS

interchange CHECK  
eRoaming System

**one-off €7,990**

for manufacturers of charging stations  
and customer management systems

## WHAT WE OFFER

### **HUBJECT Workshop**

Everything you need to know about linking your system up to the Hubject platform:

- Introduction to the Hubject interface protocol (Open Interchange Protocol OICP)
- Explanation of the Hubject eRoaming platform: architecture and functionality
- Live demonstration of user interface (Hubject Brokering System)

### **Seamless support**

Support and assistance during every stage of the connection process right up to the final end-to-end acceptance of your IT system

### **interchange certificate**

Issuing the 'Certified eRoaming System' seal
