

For Charge Point Operators

One contract. One press of a button. Thousands of new customers.

Think big: interchange CPO extends your reach beyond national boundaries and technologies. eDrivers from across Europe can find your charging station, charge up and pay easily and conveniently. More visibility. More reach: more for everyone.

AT A GLANCE

Visibility

Step into the light. The interchange seal shows that your infrastructure is part of the world's biggest eRoaming network. It means that thousands of customers can locate your charging station using apps and in-car navigation systems.

Sales

Tap the full potential. Make more use of your charging points: interchange CPO allows an unlimited number of charging points and sub-partners to be connected up. One contract. Endless possibilities.

Range

Find and be found. Customers get direct access to your infrastructure. And you get maximum reach in the European charging network.

Without interchange
Your customers: people who buy charging current from your contract partners

With interchange **CPO**
Your customers: people who buy charging current from any partner in the interchange network

With interchange **DIRECT**
Your customers: people who buy charging current from any partner in the interchange network as well as e-drivers without electrical charging contracts

COSTS

€99 per month

Incorporate a limitless number of charging points
No limit on number of charges

€5,000 one-off

Project costs for connecting up the IT

WHAT WE OFFER

Strong partners

Big-name car manufacturers and eMobility providers can work with you in the interchange network. Your common aim is to help electromobility achieve a global breakthrough. And the network is growing constantly: in 2017 alone, we managed to sign up 82 new interchange partners.

HighTech Platform

Ready for the future, intuitive, easy to use, secure, proven and ultra-fast: Hubject's new IT platform is at the heart of our mission and the driving force behind global eMobility growth. Equipped with flexible microarchitecture, user-friendly interfaces and lots of intelligent value-adding services, Hubject is the most advanced platform in the world.

Exceptional support

We make things easy for you: our support team is ready to assist you at every stage of the connection process. Digital value-adding services make the invoicing process simpler for you.

Freedom of choice

Your customers have the choice: charging points are activated either by scanning the QR code in the interchange symbol or by using RFID cards, NFC technology or Plug&Charge as per ISO15118.
